

## *Chief's Report - July 28, 2021*

-Engine 341 delays-Heads not ordered, had to be ordered from out of state. Should be back next week.

-Gremlins in 342 have been addressed.

-Jeffco HMP is completed and as a participant, we need board approval and to appoint a representative to the Advisory Committee.

-CWPP-Corrina with Ember Alliance is completing a proposal for work for us to review. Genesee's document has a lot of features we should look at, but we also discussed some items to drop that they included (97%, escape route planning).

-AP Triton has completed a technical draft and the chiefs are making corrections. I plan on having our section corrected by 8/4. Another draft will come back, more corrections, then a public document with meetings should occur, perhaps as early as October.

-4th of July was not without a hitch but was successful.

-Roger will be available for August meeting

Calls for June:

9 Medicals

2 cancelled enroute

1 Bicycle accident

1 Smoke check

1 Wildland fire

14 calls for May, 81 calls year to date as of today.
