

Chief's Report December 2023

-We had a very successful burn building last month and it was a great opportunity to refresh some crucial skills.

-The new laptops are in the ambulances and just in the nick of time. The old ones were over a decade old and becoming quite unreliable. They are part of the EMTS grant and will be half paid for by the grant.

-The new E-bikes are in and ready to be picked up. These were another EMTS matching grant. We will begin training as trail conditions permit.

-FireAside is being adopted by Evergreen, Genesee, and Foothills fire for the fire mitigation software to help make home assessments more standardized, efficient, and complete. The software also has a scheduling portal for chipping and such. Mike and I have looked at a couple different programs out there and this really is the best one without volunteer base to help do effective assessments.

-Jeffco Sheriffs are going for a BRIC grant for fire mitigation.
